

What is claimed is:

1. A fundraising team sales method utilizing the internet, comprising the steps of:
entering a plurality of team member identifiers into a data storage;
associating said plurality of team member identifiers to a plurality of products in said data
storage;

5 accessing said data storage via the internet by a customer;
selecting one of said plurality of team member identifiers by said customer; and
committing to purchase at least one of said plurality of products, thereby defining an
internet purchased product.

2. The method of claim 1, further comprising the step of combining direct sales
information with said internet purchased product.

3. The method of claim 2, further comprising the step of calculating prizes won by at
least one of said plurality of team members.

4. The method of claim 2, further comprising the step of generating sales tax records
relative to at least one state.

5. The method of claim 2, further comprising the step of delivering said internet
purchased product directly to said customer and direct sales product by way of at least one of
said plurality of team members.

6. The method of claim 1, further comprising the step of entering a plurality of email addresses corresponding to potential customers.

7. The method of claim 6, wherein said entering step is completed by at least one of said plurality of team members.

8. The method of claim 1, further comprising the step of calculating a total sale associated with said one of said plurality of team member identifiers.

9. The method of claim 1, further comprising the step of providing a plurality of passwords to a plurality of team members, each of said plurality of team members associated with a unique one of said team member identifiers, each of said plurality of passwords uniquely associated with a corresponding one of said plurality of team members.

10. A fundraising sales method, comprising the steps of:

receiving a plurality of direct orders for at least one product from a brochure sales presentation;

receiving a plurality of internet orders for one of said at least one product and an other

5 product; and

combining at least one of said plurality of direct orders with at least one of said plurality of internet orders dependent upon one of a plurality of student identifiers.

11. The method of claim 10, further comprising the step of calculating prizes won by at least one student.
12. The method of claim 10, further comprising the step of generating sales tax records relative to at least one state.
13. The method of claim 10, further comprising the step of delivering said internet purchased product directly to said customer and direct sales product by way of at least one student associated with a corresponding one of said student identifiers.
14. The method of claim 10, further comprising the step of entering a plurality of email addresses associated with potential customers.
15. The method of claim 14, wherein said entering step is completed by at least one student.
16. The method of claim 10, further comprising the step of calculating a total sale associated with said one of said plurality of student identifiers.
17. The method of claim 10, further comprising the step of providing a plurality of passwords to a plurality of students, each of said plurality of students associated with a unique one of said student identifiers, each of said plurality of passwords uniquely associated with a corresponding one of said plurality of student identifiers.
